

WireManager

Business Online users have access to Wire Manager, a reliable domestic and international wire transfer program that saves businesses time and worry.

Wire Manager has a user-friendly platform that works with major internet browsers. There is nothing to download or install. Simply log on to Business Online and select Wire Manager from Management Tools.

Initiate both domestic and international wires through Wire Manager. Wire Manager allows business clients to set-up repetitive and occasional wire templates for added convenience as well. You, as the business owner, can determine the security level which works best for your business. Dual control with token and pin authentication is available, as are call-back approval with PIN verification.

Wire Manager is one of the fastest and most reliable ways to move funds.

For additional convenience, Greenwood's State Bank Mobile Business App provides a quick, on the go method of approving wires in real time while you're out focusing on your business.
